

## Quartz crystals - general applications

### HC-49/U

**9922 520 0/3.... series**

#### FEATURES

- The units are mass produced on an automatic production line which guarantees a high level of reliability as well as a high level of uniformity. The quartz design yields low resistance and high pullability values.
- The units are available in several styles and packaging methods.

#### APPLICATIONS

- TV colour decoders
- TV teletext
- TV digital sound
- Video cassette recorders (VCR)
- Audio
- CD players
- CDI players
- DCC players
- Telephony
- Domestic appliance control
- Microprocessors
- Traffic control
- Weather balloons
- Medical systems
- Military applications
- Communication systems
- Agrarian applications
- Machine control
- Environmental applications.

#### DESCRIPTION

The unit consists of a silver-plated AT-cut quartz plate, encapsulated in a nitrogen-filled metal holder. The holder is hermetically sealed by resistance-welding and provided with connecting leads (HC-49/U).

### STANDARD MARKING<sup>(1)</sup>

- Line 1: PHILIPS
- Line 2: frequency in kHz (fundamental mode) or in MHz (overtone)
- Line 3: last five digits of catalogue number followed by the manufacturing date code (last four digits of week code in accordance with the "Philips Concern calendar system UN-D 1120").

### MASS AND LEADS

Typical mass: 1.2 g.  
The leads are finished with Sn99Cu1 or Sn60Pb40 on a nickel underplate.  
The first 1 mm from the body is not guaranteed for soldering.

(1) Special marking on product and/or package is available on request.
