# 4-bit magnitude comparator

## HEF4585B MSI

### DESCRIPTION

The HEF4585B is a 4-bit magnitude comparator which compares two 4-bit words (A and B), whether they are 'less than', 'equal to', or 'greater than'. Each word has four parallel inputs ( $A_0$  to  $A_3$  and  $B_0$  to  $B_3$ );  $A_3$  and  $B_3$  being the most significant inputs. Three outputs are provided; A greater than B ( $O_{A>B}$ ), A less than B ( $O_{A<B}$ ) and A equal to B ( $O_{A=B}$ ). Three expander inputs ( $I_{A>B}$ ,  $I_{A<B}$  and  $I_{A=B}$ ) allow cascading of the devices without external gates.

For proper compare operation the expander inputs to the least significant position must be connected as follows:  $I_{A=B} = I_{A>B} = \text{HIGH}$ ,  $I_{A<B} = \text{LOW}$ . For words greater than 4-bits, units can be cascaded by connecting outputs  $O_{A<B}$  and  $O_{A=B}$  to the corresponding inputs of the next significant comparator (input  $I_{A>B}$  is connected to a HIGH).

Operation is not restricted to binary codes, the devices will work with any monotonic code. The function table describes the operation of the device under all possible logic conditions.

- HEF4585BP(N): 16-lead DIL; plastic (SOT38-1)
- HEF4585BD(F): 16-lead DIL; ceramic (cerdip) (SOT74)
- HEF4585BT(D): 16-lead SO; plastic (SOT109-1)
- ( ): Package Designator North America

### PINNING

- $A_0$  to  $A_3$  word A parallel inputs
- $B_0$  to  $B_3$  word B parallel inputs
- $I_{A>B}$ ,  $I_{A<B}$ ,  $I_{A=B}$  expander inputs
- $O_{A>B}$  A greater than B output
- $O_{A<B}$  A less than B output
- $O_{A=B}$  A equal to B output

## Notes

- H = HIGH state (the more positive voltage)  
L = LOW state (the less positive voltage)  
X = state is immaterial

The upper 11 lines describe the normal operation under all conditions that will occur in a single device or in a serial expansion scheme.

The lower 2 lines describe the operation under abnormal conditions on the cascading inputs. These conditions occur when the parallel expansion technique is used.

	15	$15\ 000 f_i + \sum (f_o C_L) \times V_{DD}^2$	

**APPLICATION INFORMATION**

Some examples of applications for the HEF4585B are:

- Process controllers.
- Servo-motor control.
