

SN65LBC031, SN65LBC031Q, SN75LBC031 HIGH-SPEED CONTROLLER AREA NETWORK (CAN) TRANSCEIVERS

SLRS048A – MAY 1998 – REVISED APRIL 2000

- SN75LBC031 Meets Standard ISO/DIS 11898 (up to 500 k Baud)
- Driver Output Capability at 50 mA
- Wide Positive and Negative Input/output Bus Voltage Range
- Bus Outputs Short-Circuit-Protected to Battery Voltage and Ground
- Thermal Shutdown
- Available in Q-Temp Automotive
 - HighRel Automotive Applications
 - Configuration Control/Print Support
 - Qualification to Automotive Standards

description

The SN75LBC031 is a CAN transceiver used as an interface between a CAN controller and the physical bus for high speed applications of up to 500 kBaud. The device provides transmit capability to the differential bus and differential receive capability to the controller. The transmitter outputs (CANH and CANL), feature internal transition regulation to provide controlled symmetry resulting in low EMI emissions. Both transmitter outputs are fully protected against battery short circuits and electrical transients that can occur on the bus lines. In the event of excessive device power dissipation the output drivers are disabled by the thermal shutdown circuitry at a junction temperature of approximately 160°C. The inclusion of an internal pullup resistor on the transmitter input ensures a defined output during power up and protocol controller reset. For normal operation at 500 kBaud the ASC terminal is open or tied to GND. For slower speed operation at 125 kBaud the bus output transition times can be increased to reduce EMI by connecting the ASC terminal to V_{CC}. The receiver includes an integrated filter that suppresses the signal into pulses less than 30 ns wide.

The SN75LBC031 is characterized for operation from –40°C to 85°C. The SN65LBC031 is characterized for operation from –40°C to 125°C. The SN65LBC031Q is characterized for operation over the automotive temperature range of –40°C to 125°C.

(TOP VIEW)

TERMINAL FUNCTIONS

| TERMINAL | DESCRIPTION |
|------------------------|-----------------------------|
| $\overline{\text{TX}}$ | Transmitter input |
| GND | Ground |
| V _{CC} | Supply voltage |
| $\overline{\text{RX}}$ | Receiver output |
| REF | Reference output |
| CANL | Low side bus output driver |
| CANH | High side bus output driver |
| ASC | Adjustable slope control |

FUNCTION TABLE

| $\overline{\text{TX}}$ | CANH | CANL | BUS STATE | $\overline{\text{RX}}$ |
|------------------------|----------|----------|-----------|------------------------|
| L | H | L | Dominant | L |
| High or floating | Floating | Floating | Recessive | H |

L = low, H = high

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†

| | |
|--|------------------------------|
| Logic supply voltage, V_{CC} (see Note 1) | 7 V |
| Bus terminal voltage | -5 V to 20 V |
| Input current at \overline{TX} and ASC terminal, I_I | ± 10 mA |
| Input voltage at \overline{TX} and ASC terminal, V_I | $2 \times V_{CC}$ |
| Operating free-air temperature range, T_A : SN65LBC031, SN65LBC031Q | -40°C to 125°C |
| SN75LBC031 | -40°C to 85°C |
| Operating junction range, T_J | -40°C to 150°C |
| Continuous total power dissipation at (or below) 25°C free-air temperature | See Dissipation Rating Table |
| Storage temperature range, T_{stg} | -65°C to 150°C |
| Case temperature for 10 sec T_C , D package | 260°C |

† Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: All voltage values, except differential bus voltage, are measured with respect to GND.

DISSIPATION RATING TABLE

| PACKAGE | $T_A \leq 25^\circ\text{C}$ POWER RATING | OPERATING FACTOR ABOVE $T_C = 25^\circ\text{C}$ | $T_C = 125^\circ\text{C}$ POWER RATING |
|---------|---|--|---|
| D | 725 mW | 5.8 mW/°C | 145 mW |

recommended operating conditions

| | | MIN | NOM | MAX | UNIT |
|---|-------------------------|-----|-----|----------|--------------|
| Logic supply voltage, V_{CC} | | 4.5 | 5 | 5.5 | V |
| Voltage at any bus terminal (separately or common mode), V_I or V_{IC} (see Note 3) | | -2 | | 7 | V |
| High-level input voltage, V_{IH} | \overline{TX} | 2 | | V_{CC} | V |
| Low-level input voltage, V_{IL} | \overline{TX} | 0 | | 0.8 | V |
| High-level output current, I_{OH} | Transmitter | | | -50 | mA |
| | Receiver | | | -400 | μ A |
| Low-level output current, I_{OL} | Transmitter | | | 50 | mA |
| | Receiver | | | 1 | |
| Operating free-air temperature, T_A | SN75LBC031 | -40 | | 85 | $^{\circ}$ C |
| | SN65LBC031, SN65LBC031Q | -40 | | 125 | |

NOTES: 2. All voltage values, except differential bus voltage, are measured with respect to the ground terminal.
3. For bus voltages from -5 V to -2 V and 7 V to 20 V the receiver output is stable.

SYMBOL DEFINITION

| DATA SHEET PARAMETER | DEFINITION |
|----------------------|---|
| $V_{O(CANHR)}$ | CANH bus output voltage (recessive state) |
| $V_{O(CANLR)}$ | CANL bus output voltage (recessive state) |
| $V_{O(CANHD)}$ | CANH bus output voltage (dominant state) |
| $V_{O(CANLD)}$ | CANL bus output voltage (dominant state) |
| $V_{O(DIFFR)}$ | Bus differential output voltage (recessive state) |
| $V_{O(DIFFD)}$ | Bus differential output voltage (dominant state) |
| $V_{I(ASC)}$ | Adjustable slope control input voltage |

electrical characteristics over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

| PARAMETER | | TEST CONDITIONS | MIN | TYP | MAX | UNIT |
|---------------|---------------------------------------|--------------------------|---------------|-----|---------------|------------|
| $V_{O(REF)}$ | Reference source output voltage | $I_{REF} = \pm 20 \mu$ A | $0.45 V_{CC}$ | | $0.55 V_{CC}$ | V |
| $R_{O(REF)}$ | Reference source output resistance | | 5 | | 10 | k Ω |
| $I_{CC(REC)}$ | Logic supply current, recessive state | See Figure 2, S1 closed | | 12 | 20 | mA |
| $I_{CC(DOM)}$ | Logic supply current, dominant state | | | 55 | 80 | |

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Customers are responsible for their applications using TI components.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
