

# SN54HC85A, SN74HC85A 4-BIT MAGNITUDE COMPARATORS

D2684, DECEMBER 1982—REVISED JUNE 1989

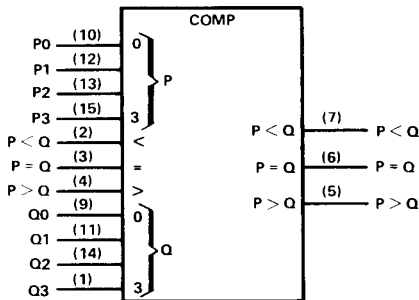

- Package Options Include Ceramic Chip Carriers, and Standard Plastic and Ceramic 300-mil DIPs
- Dependable Texas Instruments Quality and Reliability

## description

These four-bit magnitude comparators perform comparison of straight binary and straight BCD (8-4-2-1) codes. Three fully decoded decisions about two 4-bit words (P, Q) are made and are externally available at three outputs. These devices are fully expandable to any number of bits without external gates. Words of greater length may be compared by connecting comparators in cascade. The  $P > Q$ ,  $P < Q$ , and  $P = Q$  outputs of a stage handling less significant bits are connected to the corresponding  $P > Q$ ,  $P < Q$ , and  $P =$  inputs of the next stage handling more significant bits. The stage handling the least significant bits must have a high-level voltage applied to the  $P = Q$  input. The cascading path of the 'HC85A is implemented with only a two-gate-level delay to reduce overall comparison times for long words.

The SN54HC85A is characterized for operation over the full military temperature range of  $-55^{\circ}\text{C}$  to  $125^{\circ}\text{C}$ . The SN74HC85A is characterized for operation from  $-40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$ .

## logic symbol†

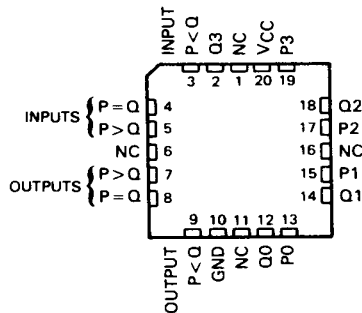

† This symbol is in accordance with ANSI/IEEC Std 91-1984 and IEC Publication 617-12.

Pin numbers shown are for J and N packages.

**absolute maximum ratings over operating free-air temperature range†**

Supply voltage, $V_{CC}$ .....	-0.5 V to 7 V
Input clamp current, $I_{IK}$ ( $V_I < 0$ or $V_I > V_{CC}$ ) .....	± 20 mA
Output clamp current, $I_{OK}$ ( $V_O < 0$ or $V_O > V_{CC}$ ) .....	± 20 mA
Continuous output current, $I_O$ ( $V_O = 0$ to $V_{CC}$ ) .....	± 25 mA
Continuous current through $V_{CC}$ or GND pins .....	± 50 mA
Lead temperature 1,6 mm (1/16 in) from case for 60 s: FK or J package .....	300°C
Lead temperature 1,6 mm (1/16 in) from case for 10 s: N package .....	260°C
Storage temperature range .....	-65°C to 150°C

† Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

**recommended operating conditions**
